tank containers

∞

countless individual solutions

Whatever the technical challenge, TWS will provide a solution for new tank containers using state-of-the-art technology and engineering. Whether you opt for proven standards or sophisticated advanced individual solutions – they all have one thing in common: the benefit of the customer.

Professional and fast

A short phone call to TWS is all it takes for a team of experienced staff to look into customers' wishes and needs. Expert solutions guarantee the swift, global availability of every type of tank container.

As a company, TWS has always set itself the highest quality standards and is constantly improving on them. Clear customer focus, cost-efficient processing and the safe handling of products and hazardous substances are at the core of our approach. With its core expertise in container leasing, as well as technical consulting, positioning and insurance, TWS provides a full-service solution while maintaining consistently high standards.

Individual planning:

- Tank containers for all customers and product requirements independent global network of depots, workshops and cleaning facilities
- Central equipment coordination and monitoring

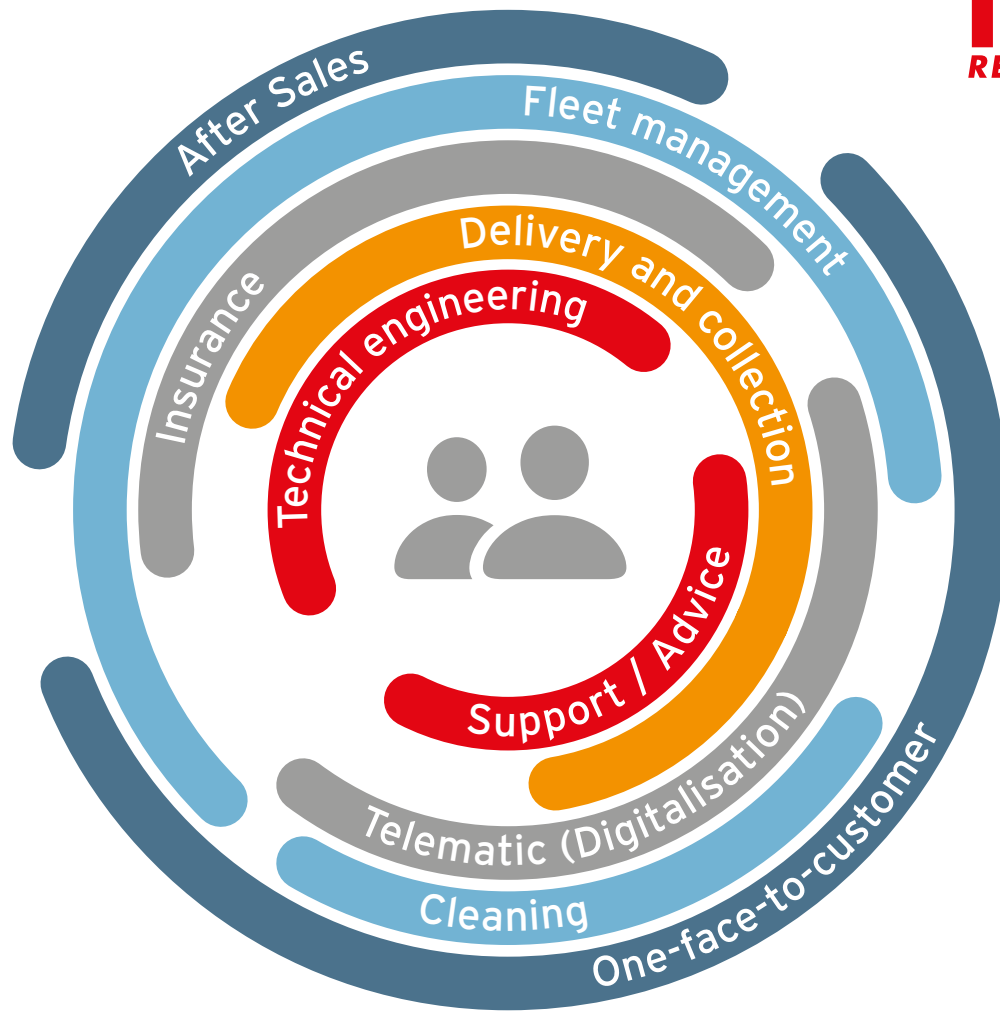

Standard tank container

TWS has a large fleet of ISO tank containers and swapbodies with internationally valid approvals UN T11 to UN T14. The tank containers are in different volumes and designs, such as with and without baffles available.

Special tank container & equipment

Tank containers with special requirements, such as heating and cooling element, agitator or super insulation are at TWS at any time, also at short notice and in small quantities rentable.

Our approach: The focus is on the customer

Product-specific tank container

TWS finds the right tank container for every product. The large portfolio includes various high-quality linings for high purity and corrosive chemicals, but also food tank containers with special fittings, to meet high hygiene requirements.

Customized solutions

From product requirements, rental conditions and flexible rental times to technical possibilities TWS advises with expertise and experience. When implementing individual projects to our customers TWS staff is also available on site.

Individual solutions and possibilities

From individual fittings to various different linings - the experienced TWS team will develop the appropriate container to meet customers' needs. In addition to their professional and technical expertise, they also have profound product knowledge. Fast decision-making processes and utmost flexibility ensure that customers receive the tank containers they have ordered, fast and as requested. Container concepts that comply with the law, for every product, in any volume, and to any deadline - these performance promises continuously motivate staff and partners around the world to keep improving constantly.

Flexible transport and long-term use

The tank container can be used as an intermodal means of transport both by road and by rail. TWS tank containers are designed for long-term and repeated use. The cylinder is made of stainless steel and is designed for a long service life. The stainless steel used can be recycled.

Optimize logistics and storage capacities

Mobile solutions are possible anywhere with TWS. The use of TWS tank containers ensures the supply of liquid goods in regions with a need for structural stabilization. They also represent a flexible and short-term expansion of storage options, e.g. directly at the production site to avoid bottlenecks in the processing of liquid products.

Quality assurance through digitization

TWS tank containers with agitators and heating system have a clear operation via touch panel. The language can be simply switched to different language versions and makes the use on site easier. The tank containers can also be equipped with telematics. This enables permanent monitoring of the supply chain and provides information immediately if there is a deviation from the specified product temperature.
